

SCHOOLS Uncovering the fun of science with Salesforce

Kieran Carrick, Salesforce, with Tanna Tan, Kamli Marecki and Rachel Kelly O'Brien

Angels fly in to science project

SIXTH-class students from Guardian Angels' National School, Blackrock, recently paid a visit to the offices of Salesforce.com at Sandford Industrial Estate, where they were greeted as "scientists of the future" by Kieran Carrick, vice-president, professional services.

The students were visiting the company to participate in a science workshop, as part of the company's annual junior achievement programme, Our Universe. With the help of company employees, the students delved into the lives of famous scientists, past, present and fictional, and answered quiz questions on their lives and achievements, thus gaining a useful insight into science and the fun of learning.
